Custom Profile Install Instructions

How to install custom profiles for use on the following Canon models:

iPF6000s/iPF6100/iPF8000S/iPF8100/iPF9000s/iPF9100

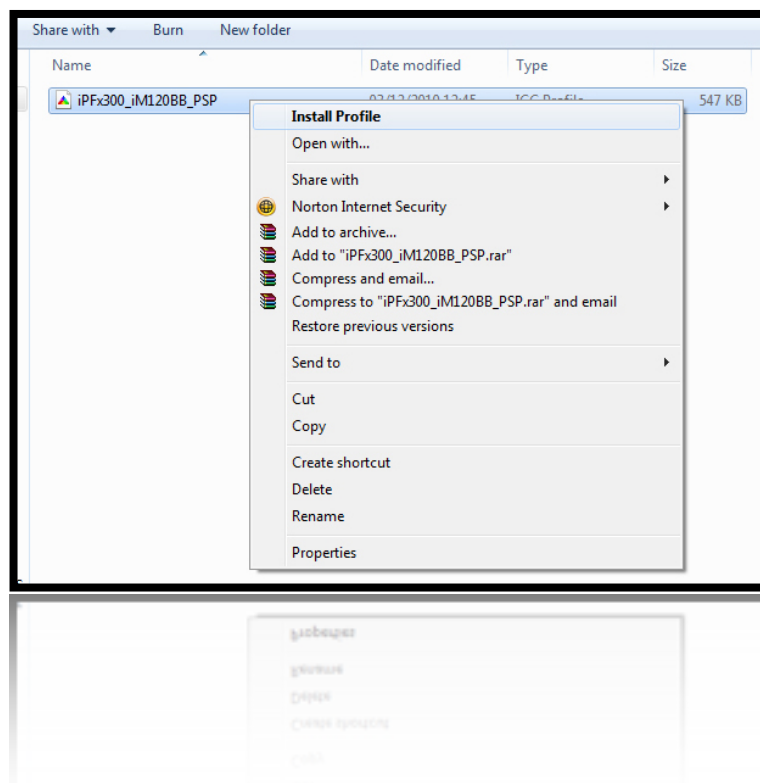

Mac Users

Manually drag and drop the profile (file with the .icc extension) into the following location: **HD/User/Library/ColorSync/Profiles**

PC Users

Right click on the profile (file with the .icc extension) then left click on “**Install Profile**”.

How to select & use new profiles - Photoshop Plug-In

After the steps above are complete, the new profiles will be available to view in the Photoshop Plug-In by selecting “**Output Profile**”.
